

VUL-FRM-19-16 Permit to Disturb

VUL-FRM-19-16 Permit to Disturb is to be completed by person responsible for disturbance in previously unmined areas prior to works commencing. This form allows the management of environmental aspects such as Cultural Heritage, topsoil, flora and fauna and water management.

Section 1 – Permit Applicant Details			
Name:		Date:	
Role:		Company:	
Section 2 – Disturbance Details			
Location of Proposed Activity:			
Scope of work & reason for disturbance:			
Total area of proposed disturbance:			
Previous Disturbance:	☐ Undisturbed ☐ Pasture ☐ Disturbed		
Date work to commence:		Date Permit Expires	
Section 3 – Flora and Fauna Management			
Existing vegetation:	☐ Remnant ☐ Grazing Pasture ☐ Riparian (watercourses/drainage lines) Details/other:		
Known animal breeding places:	☐ Yes ☐ No		
Clearing controlled:	☐ Survey Pegs ☐ Supervision ☐ Other:		
Clearing Process:			
Erosion & sediment controls:			
Basic Management Principles:			
Section 4 – Waterways and Drainage Line Management			
Waterways within 100m of proposed disturbance?	☐ Yes	☐ No	Waterway name/Description:
Spoil amount to be removed:		Proposed spoil disposal site	
Basic Management Principles:			

Section 5- Cultural Heritage Management

Have previous cultural heritage studies been carried out for the general area? ☐ Yes ☐ No

Were any cultural heritage values identified in the studies within 100m of the proposed works? ☐ Yes ☐ No

List items:

Could rock outcrops, caves, watercourses, wetlands, waterholes, drainage lines, remnant vegetation be impacted by proposed work? ☐ Yes ☐ No

Basic Management Principles:

Section 6- Rehabilitation of Impacted Site

Can the impacted site be rehabilitated within 6 months of disturbance? ☐ Yes ☐ No

Method of rehabilitation:

☐ Hand spread mix ☐ Mechanical spread mix ☐ Final rehabilitation

Details:

Basic Management Principles:

Section 7 – Additional Management Strategies

Section 7- Attachments

☐ Project map ☐ Scope of works ☐ Additional permits ☐ Photographs ☐ Other

Details:

Section 8 – Disturbance Area

Is the proposed work contained within the approved disturbance footprint? ☐ Yes ☐ No

If disturbance is in the buffer zone, has the overall balance been checked to ensure it can be offset elsewhere? Explain where it can be offset in the relevant category below: ☐ Yes ☐ No

Is the maximum disturbance per category within the allowable limits for the EA? *See table A1 of the EA (Table A1 – Maximum disturbance area for each mining area)* ☐ Yes ☐ No

NB. If any of the above are not able to be signed off, escalation to Corporate Management is required

Section 8 – Verification

All coordinates of disturbances have been checked and verified as correct in accordance with maximum disturbances limits.
